

DESIGN

Below picture shows the flow of Design Module

As you know Every module consist of 3 options in menu list such as:-

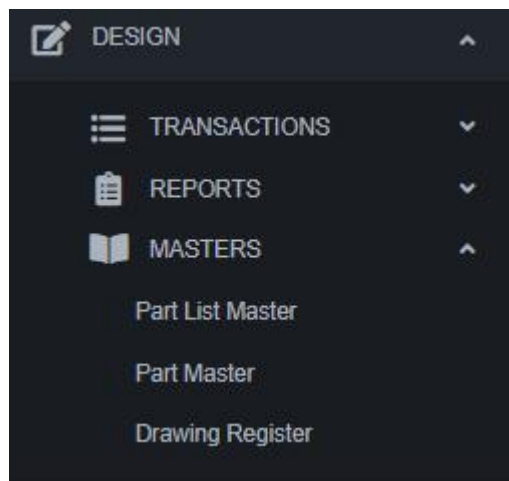

1. Transactions
2. Reports
3. Masters

Few modules have 3 Screens such as

1. Pending Screen
2. Add Edit Screen
3. Index Screen

1. Masters

CREATING PARTS FROM THE PENDING LIST OF QUOTED PART?

If the quotation is given to any customer and order is confirm then through the Quotation Awarded BDT send the request to add the Part. That will show here as a pending parts. **To add new Part, follow the below steps.**

Click on Design--> Transaction --> Pending Parts.

10 records per page

Search...

WO No	Part Name	Part Description	Remarks	Action
24250046	SIMPLEX SHELL & TUBE HEAT EXCHANGER	200 KW	WO NO-1247120277	Part Added 
24250040	STHES-5.3kw (300 CFM)	Simplex Shell & Tube Heat Exchanger	ok	Part Added 
24250039	STHED-25LPM	25LPM	Duplex Heat Exchanger with 3 way ball valves	Part Added 

Previous 1 Next

- In the above screen if the part is already added then click on Button 
- If part was not added in Part Master, then click on Button 
- It will Redirect to the Part Master Add edit page.
- To add the new part in part master click here. (provide hyper link of part master)

CREATING PARTS FROM PART LIST MASTER

1.FG Part List Master

- Click On Masters----->Part List Master----->Finish Goods--->AddNew
- Select Part Type
- Enter All Deatils

The screenshot shows the 'FG Part List Master' form in the CFS system. The form is titled 'FG Part List Master' and has a search bar at the top. The form fields are as follows:

- *Part Type: Assembly (dropdown)
- *FG Type: SIMPLE SHELL EXCHANGER SIMPLEX (text input)
- *FG Type Code: SSE (text input)
- Sub Type: SIMPLE (text input)
- Sub Type Code: SS (text input)
- *Status: Active (dropdown)

At the bottom of the form, there are two buttons: 'Add' (blue) and 'Close' (red). The system header shows 'CFS' and 'Session ends in 27:44'. The user is 'ADMIN' from 'POSITRON ENGINEERING CORPORATION'.

2. Part Master

- Click On Masters----->Part Master----->Finish Goods--->AddNew.
- Select Part Type.
- Enter All Deatil and genrate code.

The screenshot shows the 'FG Part Master' form in the CFS system. The form is titled 'FG Part Master' and has a search bar at the top. The form fields are as follows:

- *Part Type: Assembly (dropdown)
- *FG Type: SHELL & TUBE HEAT EXCHANGER (dropdown)
- Sub Type: DUPLEX (dropdown)
- Drawing No: P24.2.1.00001 (dropdown)
- *Part No.: STHED0002 (text input)
- *Part Name: SHELL & TUBE HEAT EXCHANGER DUPLEX P24.2.1.1 (text input)
- *Unit (P): Nos. (dropdown)
- Unit (S): Nos. (dropdown)
- Remarks: SIMPLE SHELL HEAT EXCHANGER (text input)
- *Status: Active (dropdown)

At the bottom of the form, there are two buttons: 'Add' (blue) and 'Close' (red). The system header shows 'CFS' and 'Session ends in 29:40'. The user is 'ADMIN' from 'POSITRON ENGINEERING CORPORATION'.

3. Drawing Register

- Click on masters----->Drawing Register
- Select drawing type new or old.
- Select drawing Doc Year and Category.
- Enter all details.
- And click on Add Button.

to exit full screen, press and hold [ESC]

2.DRAWING LINK

HOW TO LINK DRAWING ?

- If part is selected in part pending list form then Drawing linking is done for that part.
- In this Drawing linking form user have to link all parts with that particular drawing in that user has to define the Sub-assemblies for main Assembly drawing in single this particular form.
- To create drawing link follow the below steps.

Click on Design--> Transaction --> Drawing Link.

After clicking this menu it will shows following drawing index like.

Drawing Linking							
10 records per page Search...							
Part Number	Part Name	Drawing No	Rev	Rev Date	Remarks	Status	Action
STHES0004	SHELL & TUBE HEAT EXCHANGER SIMPLEX	P24.1.1.00006	0	06-06-2024		Active	 
STHES0003	SHELL & TUBE HEAT EXCHANGER SIMPLEX	P24.1.1.00005	0	06-06-2024		Active	 
STHED0001	SHELL & TUBE HEAT EXCHANGER DUPLEX	P24.1.1.00004	0	05-06-2024		Active	 
TBA0001	TUBE BUNDLE ASSEMBLY	P24.1.1.00003	0	05-06-2024		Active	 
SAS0001	SHELL ASSEMBLY SIMPLEX	P24.1.1.00002	0	05-06-2024		Active	 
STHES0001	SHELL & TUBE HEAT EXCHANGER SIMPLEX	P24.1.1.00001	0	04-06-2024		Active	 

- After press the Add new option for new record of drawing

Drawing Linking									
*Part Number	STHES0004 SHELL & TUBE HEAT EXCHANGER SIMPLEX								
*Drawing No	P24.1.1.00006	*Rev No	0	Rev Date	06-06-2024	Choose File	No file chosen		
Remarks						*Status	Active	Add	Close
Part Number	Part Name	Drawing No	Rev	Rev Date	Attachments	Remarks	Status	Action	
STHES0004	SHELL & TUBE HEAT EXCHANGER SIMPLEX	P24.1.1.00006	0	06-06-2024	Attachments View		active	 	

- When user allocated part number and drawing with this option then user can reused that particular drawing and part list for further use.

2.DRAWING MFG LINK

- And same procedure for Drawing Linking

Drawing MFG Linking								
10 records per page Search...

3.BILL OF MATERIAL

HOW TO CREATE ASSEMBLY BOM?

- If part is selected as Assembly and Drawing linking is done for that part, then only you can create an Assembly BOM.
- In this BOM user has to define the Sub-assemblies for main Assembly.
- To create Assembly BOM follow the below steps.

Click on Design--> Transaction --> BOM.

Customer Name	OA No	OA Id	MFG SLNo	Capacity	Qty	Date	BOM
HYDAC INDIA PVT LTD	24250001	1	24250001/1 - 1	30 KW	1.00	16-12-2024	

- In the above screen it displays all the pending parts which are pending for assembly BOM.
- Click on Assembly BOM button, redirect to add edit page.

Machined/ Boughtout	Qty	Unit	Drg. No	Finish Size	Raw Material	Qty	Unit	Raw Size	PTS No	Remarks	Revision Remarks	Ref Drg	Action
---------------------	-----	------	---------	-------------	--------------	-----	------	----------	--------	---------	------------------	---------	--------

- After above details it will shows following details .

Bill of Material Pending / Index / Home

Machined/ Boughtout	Qty	Unit	Dwg. No	Finish Size	Raw Material	Qty	Unit	Raw Size	PTS No	Remarks	Revision Remarks	Ref Dwg	Action
NFCS01065AS150SO - NOZZLE FLANGE CARBON STEEL SA 105 DN 65 ASME B16.5 CL 150 SORF	1.0000	NOS	P24.1.2.00005						PTS001			N	  
NFCS01080AS150SO - NOZZLE FLANGE CARBON STEEL SA 105 DN 80 ASME B16.5 CL 150 SORF	1.0000	NOS	P24.1.2.00005						PTS001			N	  
ABCS0106M040 - ALLEN BOLT CARBON STEEL GR. 12.9 M6 40 LG	20.0000	NOS	P24.1.2.00005						PTS001			N	  

*Approval

Created By ADMIN on 6/7/2024 12:00:00 AM Modified By

- Select the revision number.
- Select the valid Component from the Drop-down.
- Enter the Qty. per Piece.
- Select the Level of Assembly.
- Click on Add. To add assembly.
- You can add multiple assemblies.
- Click on submit to submit the form.

NOTE: -

1. If the part is assembly, then only display in the pending screen.
2. If the drawing linking of the part is done, then only the Part will show in the pending screen for Assembly BOM.

4.PTS MASTER

HOW TO SET PURCHASE TECHNICAL SPECIFICATION MEANS PTS MASTER FOR THE PURCHASE PART?

If Part is selected as assembly or even not selected in Part Master, in both cases it will show pending for Raw material in the pending screen.

- To set PTS Master BOM follow the below steps

Click on Design--> Transaction --> PTS Master BOM.

PTS Master Add New / Home

10 records per page Search...

S.No	PTS No	Material	Specification Designation	Attachments	Remarks	Status	Action
1	PTS001	PICS01003160SL	IPE CARBON STEEL SA	Attached View		Active	Edit

Previous 1 Next

- Press Add New option For Addition Of Purchase Material Technical Specification or PTS Master.

PTS Master Index / Home

*PTS No: PTS001 *Rev. No: 0 *Type: PI-Pipe

*Name of the Material: PICS01003160SL *Specification Designation: IPE CARBON STEEL SA
